Product Engineer | AI Engineer | Forward Deployed Engineer | 9x Hackathon & Competition Winner

Experience

Highview (Early-Stage EdTech Startup) – Jan 2026 – Present
AI Product Engineer – United States

- Cut production attendance processing from 15 minutes per session to seconds while achieving 91% face-matching accuracy through FastAPI/Python services, computer vision, transcription, and AWS Rekognition.
- Owned Studentlytics end to end, leading workflow discovery with staff and translating user needs into a role-based React/TypeScript product supporting 64 students, 12 staff members, and intern workflows.
- Designed and deployed an LLM-powered analytics assistant for natural-language queries over course and engagement data, integrating Supabase, REST APIs, AWS Lambda/API Gateway, and Vercel.

Box – Jan 2025 – Jun 2025
Data Science Intern – Redwood City, CA

- Shipped PySpark and SQL pipelines that standardized data validation, feature generation, and recurring KPI reporting, cutting manual processing by 40% across four cross-functional teams.
- Delivered Tableau and Power BI adoption dashboards for recurring stakeholder reviews, informing feature prioritization that contributed to a 15% increase in adoption.

Hashroot Limited – Jul 2023 – Jun 2024
Internal Tools & Product Engineering (Business Data Analyst) – Pune, India

- Built full-stack internal tools with SQL/Python backends and dashboard interfaces for customer segmentation, pricing, and reusable reporting, surfacing upsell opportunities that grew revenue by 10%.
- Automated stakeholder dashboards and reporting workflows across sales, marketing, and operations, eliminating 20+ hours of weekly work and improving KPI visibility.

Award-Winning Engineering Projects

Stanford University AI Hackathon Winner — Locus [Live] [GitHub] – 2026
Next.js, React, TypeScript, Vercel Sandbox, Supabase, Clerk, AI SDK

- Built and deployed an AI developer tool that maps natural-language tasks to dependency-aware code slices and runs agents in isolated sandboxes, achieving 100% historical fix-file recall and 53% median estimated context reduction across 15 benchmark cases.

AWS×INRIX — Studentlytics Hackathon Winner [Public Demo] – 2025
AWS Lambda, Step Functions, S3, Rekognition, DynamoDB, React, TypeScript

- Shipped an award-winning full-stack prototype in 24 hours, combining a React/TypeScript interface with an event-driven AWS pipeline for video processing, attendance, engagement scoring, and analytics.

YC Stack Auth Hackathon Winner — Crowd Symphony [Live Demo] – 2025
Next.js, React, TypeScript, MediaPipe Hands, Socket.IO, Web Audio API

- Built and deployed a real-time, multi-device music product with QR-code onboarding, MediaPipe gesture controls, Socket.IO sessions, and synchronized Web Audio API updates.

AgentRogue Hackathon Winner — Gatekit [Live] [GitHub] – 2026
TypeScript, Next.js, PostgreSQL, Agent SDK, Policy Engine, Human Approvals

- Built and deployed a governance layer for production AI agents, shipping an SDK and pre-execution policy engine that allows, denies, or routes real-world actions to human approval with immutable audit records.

Beta Fund×GMI Cloud Hackathon Winner — Morphic [Live] [GitHub] – 2026
Next.js, TypeScript, OpenAI, GitHub API, Vercel Workflow, Vercel Sandbox, Neon

- Won a formally judged hackathon with 120+ participants by building and deploying an adaptive developer workspace that turns live GitHub evidence into structured plans and executes approved coding-agent runs in isolated sandboxes.

Technical Skills

Engineering: Python, TypeScript, JavaScript, SQL, React, Next.js, Node.js, Vite, Tailwind, FastAPI, REST APIs, API Design, Testing, Debugging
Systems & Cloud: Webhooks, Socket.IO, WebSockets, Supabase/PostgreSQL, Clerk Authentication, DynamoDB, API Gateway, AWS Lambda, Step Functions, S3, Vercel, Vercel Sandbox, Docker, CI/CD, Git, GitHub
Data & Platforms: BigQuery, Snowflake, Tableau, GCP Dataproc
Applied AI: LLM Applications, AI Agents, RAG, LangChain, LangGraph, Context Engineering, Agent Tool Use, MCP, Prompt Engineering, AI Evaluation, Computer Vision, Whisper, AWS Rekognition, Vercel AI SDK, OpenAI Codex, Claude Code
Delivery: Technical Discovery, Requirements Definition, Solution Architecture, Implementation Planning, UX Prototyping, User Feedback, Stakeholder Management, Product Launch, Agile/Scrum

Research Publication

Multivariate Financial Forecasting using the Chronos Time Series Foundation Models [arXiv] – May 2026
Amazon Chronos-2, Time-Series Forecasting, RMSE, MAPE

Education

Santa Clara University – Sep 2024 – Dec 2025
M.S. in Business Analytics – GPA: 3.7 – Machine Learning, NLP, SQL/Database Management, Product Management – Santa Clara, CA
Indira Institute of Management, Pune University – 2023
B.B.A. in Digital Marketing – GPA: 3.7 – Pune, India
