Education

Santa Clara University – Sep 2024 – Dec 2025

M.S. in Business Analytics – GPA: 3.7 – Data Analytics with Python, Machine Learning, SQL/Database Management, Tableau, NLP, Product Management, Marketing Analytics, Strategic Management – Santa Clara, CA

Indira Institute of Management, Pune University – Jun 2020 – Jun 2023

B.B.A. in Digital Marketing – GPA: 3.7 – Business Statistics, Data Analytics, Data Mining, Basic Business Analytics – Pune, India

Experience

Highview – Jan 2026 – Present

AI Product Manager & Product Engineer Intern – United States

- Defined the product vision and roadmap for Studentlytics, an AI-powered platform using real-time video and audio analysis to automate attendance, track check-ins and check-outs, measure engagement, and help educators identify at-risk students.
- Created PRDs, user stories, and acceptance criteria while managing sprint planning, backlog prioritization, and product releases.
- Built and shipped session scheduling, course analytics, and an AI Analytics Assistant that enables educators to query engagement data using natural language.

Box – Jan 2025 – Jun 2025

Data Science Intern – Redwood City, CA

- Built scalable PySpark and SQL data pipelines for wrangling, modeling, and statistical analysis, reducing manual processing by 40% and supporting four cross-functional teams.
- Developed churn prediction workflows across 100K+ records and 10K+ accounts using BigQuery, XGBoost, and feature engineering.
- Built Tableau and Power BI dashboards for stakeholder analysis, shaping product decisions and increasing feature adoption by 15%.

Hashroot Limited – Jul 2023 – Jun 2024

Business Data Analyst – Pune, India

- Used SQL and Python for data cleaning, modeling, and customer segmentation, surfacing upsell opportunities that informed the roadmap and grew revenue by 10%.
- Automated Tableau dashboards across sales, marketing, and operations, eliminating 20+ hours of weekly reporting and improving KPI visibility.
- Ran pricing A/B tests and analyzed user behavior to improve pricing alignment, supporting quarter-over-quarter GMV and profit growth.

Skills & Tools

Languages: Python, SQL, PySpark, JavaScript, TypeScript

AI Systems & Development Tools: LLMs, AI Agents, RAG, Prompt Engineering, Claude Code, OpenAI Codex, Windsurf, Model Context Protocol (MCP)

Full-Stack & APIs: FastAPI, React, Next.js, REST APIs, Socket.IO, WebSockets

Data, Analytics & ML: Machine Learning, NLP, XGBoost, Time-Series Forecasting, BigQuery, Snowflake, Tableau, Power BI, Qlik Sense, Excel, Pandas, NumPy, ETL Pipelines, A/B Testing

Cloud & Platforms: AWS Lambda, S3, API Gateway, GCP Dataproc, Salesforce, Git, GitHub

Product: Product Strategy, Roadmapping, PRDs, User Stories, Stakeholder Management, Cross-Functional Collaboration, Scrum, OKRs, Backlog Prioritization, GTM

Award-Winning Projects

A10 Networks — AI Product Manager Hackathon Winner (1st Place) – 2025

PRD, OKRs, Scrum, GTM

- Defined the product vision and roadmap for an AI workload-protection concept, creating the PRD, OKRs, prioritized backlog, GTM strategy, and ARR model; won first place.

Amazon Web Services × INRIX — Studentlytics Hackathon Winner (1st Place) – 2025

Amazon Web Services, Video Analytics, ML

- Delivered a full-stack student engagement prototype from user stories to production deployment in 24 hours; the project led to a Highview internship to continue developing the platform.

SCU Analytical Showdown Winner – 2025

Segmentation, Predictive Modeling, ROI Forecasting

- Performed data cleaning, customer segmentation, predictive modeling, and ROI forecasting for Nazava’s business case, earning top recognition across all competing teams.

YC Stack Auth Hackathon Winner — Crowd Symphony – 2025

Computer Vision, Real-Time Systems, Full-Stack Development

- Built a real-time interactive music platform with MediaPipe hand tracking, QR-code audience access, and Socket.IO updates synchronized across devices.

Publications

Multivariate Forecasting with Foundation Models: Using Chronos-2 for Economic and Financial Forecasts – May 2026

Amazon Chronos-2, Time-Series Forecasting, RMSE, MAPE

- Co-authored a research paper available on arXiv evaluating Amazon Chronos-2 for multivariate economic and financial forecasting across Magnificent 7 equities and U.S. Treasury rates, finding that multivariate inputs consistently improved forecast accuracy over univariate baselines.
