Santa Clara, CA | +1 (640) 444-8525 | taranggoyal2000@gmail.com | LinkedIn | GitHub
AI Product Engineer | Forward Deployed AI Systems, AI Agents, Computer Vision

Experience

Highview – Jan 2026 – Present

AI Product Manager & Product Engineer Intern – United States

- Built and deployed Studentlytics using React, TypeScript, Vite, and Tailwind, supporting role-based staff, student, and intern workflows for cohorts, sessions, courses, opportunities, profiles, and settings.
- Developed AI attendance and engagement workflows using FastAPI, Python, OpenCV, face-recognition, Whisper transcription, and AWS Rekognition to process class recordings with 91% face-matching accuracy.
- Integrated Supabase authentication, Vercel deployment, API-backed student workflows, and AWS Lambda/API Gateway chatbot endpoints for customer- and stakeholder-facing natural-language analytics and production deployment.

Box – Jan 2025 – Jun 2025

Data Science Intern – Redwood City, CA

- Built scalable PySpark and SQL pipelines for wrangling, modeling, and statistical analysis, reducing manual processing by 40% across four cross-functional teams.
- Developed churn prediction workflows across 100K+ records and 10K+ accounts using BigQuery, XGBoost, and feature engineering.
- Created Tableau and Power BI dashboards for stakeholder analysis, shaping product decisions and increasing feature adoption by 15%.

Hashroot Limited – Jul 2023 – Jun 2024

Business Data Analyst – Pune, India

- Used SQL and Python for data cleaning, modeling, and customer segmentation, surfacing upsell opportunities that informed roadmap decisions and grew revenue by 10%.
- Automated Tableau dashboards across sales, marketing, and operations, eliminating 20+ hours of weekly reporting and improving KPI visibility.
- Analyzed pricing experiments and user behavior to improve pricing alignment and support quarter-over-quarter GMV and profit growth.

Award-Winning AI & Engineering Projects

AWS × INRIX — Studentlytics Hackathon Winner – 2025

AWS Lambda, Step Functions, S3, Rekognition, DynamoDB, React, TypeScript

- Built the original award-winning AWS video pipeline using Lambda, Step Functions, S3, Rekognition, DynamoDB, and EventBridge to match student faces, calculate attendance/engagement scores, and store analytics results.

YC Stack Auth Hackathon Winner — Crowd Symphony – 2025

Next.js, React, TypeScript, MediaPipe Hands, Socket.IO, Web Audio API

- Built a real-time audience music platform using Next.js, MediaPipe hand tracking, Socket.IO sessions, QR-code audience joining, and Web Audio API controls to sync gesture-driven volume changes across devices.

A10 Networks — AI Product Manager Hackathon Winner – 2025

AI Security, Product Strategy, Technical Architecture, GTM, ARR Modeling

- Defined the product strategy and technical architecture for an AI workload-protection platform covering prompt-injection defense, data-leakage prevention, agent guardrails, performance metrics, GTM, and ARR modeling; won 1st place.

Skills & Tools

Languages: Python, SQL, PySpark, JavaScript, TypeScript

AI Systems & Development Tools: LLMs, AI Agents, RAG, Prompt Engineering, LangChain, LangGraph, AI Evaluation, NLP, Computer Vision, MediaPipe, OpenCV, face-recognition, Whisper, OpenAI Codex, Model Context Protocol (MCP)

Full-Stack & APIs: FastAPI, React, Vite, Next.js, REST APIs, Webhooks, Socket.IO, WebSockets, Web Audio API, Supabase

Data, Analytics & ML: Machine Learning, XGBoost, Time-Series Forecasting, BigQuery, Snowflake, Tableau, Power BI, Pandas, NumPy, ETL Pipelines, A/B Testing

Cloud, DevOps & Platforms: AWS Lambda, Step Functions, S3, API Gateway, Rekognition, DynamoDB, GCP Dataproc, Vercel, Docker, CI/CD, Git, GitHub

Product & Delivery: Technical Discovery, Solution Architecture, Implementation Planning, PRDs, User Stories, Stakeholder Management, Scrum, OKRs

Education

Santa Clara University – Sep 2024 – Dec 2025

M.S. in Business Analytics – GPA: 3.7 – Machine Learning, NLP, SQL/Database Management, Product Management – Santa Clara, CA

Indira Institute of Management, Pune University – Jun 2020 – Jun 2023

B.B.A. in Digital Marketing – GPA: 3.7 – Data Analytics, Data Mining, Business Statistics – Pune, India

Research Publication

Multivariate Forecasting with Foundation Models: Using Chronos-2 for Economic and Financial Forecasts – May 2026

Amazon Chronos-2, Time-Series Forecasting, RMSE, MAPE

- Co-authored an arXiv paper evaluating Amazon Chronos-2 for multivariate economic and financial forecasting across Magnificent 7 equities and U.S. Treasury rates.
